DOT MATRIX

by Milton Glaser

Meeting a living legend usually requires a pilgrimage to India, ultra expensive per-plate benefits, or chance encounters in amazing cities like our NY. When Milton Glaser and his talented designer Molly sought us out, well, we flipped. When they proceeded to show us concepts like Dot Matrix, it was on! This depth-bending geometric literally comes off the wall with ribbons on top of ribbons...or is it aluminum cans stacked to the ceiling? This pattern forces you to take a closer look, then back way off, then come right back for more. Genius!
