One wall of a series that Jon and Boone have been working on based upon the premise of bringing the outside inside called Rock In. DUMBO wall is just that – Down Under the Manhattan Bridge Overpass, but now it can transform a clean wall into a textured and interesting place to show off your contemporary furniture collection. We highly recommend printing this on Plaster to get the maximum realistic effect.

The image is a non-repeating mural and is scaled and cropped based on the provided wall dimensions.
