MONA LISA

by Andy Warhol® x Flavor Paper

Some might argue that the Mona Lisa is the ultimate Pop icon. So, it's no surprise that Andy Warhol was swept up in the hype when da Vinci's painting premiered in NY in 1963, and therefore had to – as the King of Pop Art – produce his own version of the art sensation. Warhol's toast sparked a series of canvases that are among the earliest works for which he used silkscreening to efficiently make multiples of preexisting images. Included in the mix is *Colored Mona Lisa*, one of the largest in the group that's also viewed as one of the most momentous pieces of Warhol's early years. It's realized by assembling a progression of multicolored Mona impressions to create a commentary on the omnipresent nature of the portrait as well as its recurrent reproduction. Flavor Paper's rendition of the archetypal artwork is achieved by applying a Warholian technique where FP artists utilize and alternate 5 screens to achieve intentionally varied prints in size, composition, color, and intensity. The result: a wall of original art that celebrates both innovators, da Vinci and Warhol... and that we think would make Mona Lisa smile.
