TEARDROP WALL

by Boone Speed, Jon Sherman

One wall of a series that Flavor founder and creative director Jon Sherman, as well as collaborator Boone Speed, have worked on based upon the premise of bringing the outside inside called Rock In. Teardrop Wall is a man made rock outcropping in Battery Park, NY that is shadowed by the high rises encircling it, creating the nice algae coloring that adds so much to this beautiful piece. With 10' ceilings you can run this 34' wide cleanly – a super-sized design element. We highly recommend printing this on Plaster to get the maximum realistic effect.

The image is a non-repeating mural and is scaled and cropped based on the provided wall dimensions.
